Straight Oils

Steelgard® 20-M1 Base

An indoor rust preventive base. Does not contain heavy metals. For use on all ferrous surfaces including bearing and tool steels. Can be used neat for maximum protection or diluted.

Steelgard® 43-MX Series

A non-staining corrosion preventative for long-term indoor storage protection of steel. Does not contain nitrites, phenols, arsenic, mercury, lead, barium or other hazardous materials.

Soluble Oils

Steelgard® 1926-BW

A soluble oil type of rust preventive for steel and non-ferrous metals for indoor storage protection of up to 6 months.

Rainkote® 75

An emulsifiable oil-based rust preventive with a thin oily film provides indoor protection of steel, cast iron, or galvanized surfaces for up to 6 months and can be used in spray or immersion applications.

Steelgard® M-535-RPB

A water-soluble oil for the prevention of yellow metal tarnish and the prevention of corrosion on steel. Bio stable and good for hard water situations.

Synthetics

Steelgard® 1883-4

A synthetic, water soluble rust preventive concentrate for temporary (3-4 months) indoor storage protection of steel and cast or malleable iron.

Steelgard® 1302-J

A rust protector for all ferrous metals including cast and malleable iron which can also be used in spray washer applications for mild cleaning and rust protection.

Steelgard® 8200-H

A synthetic for the indoor storage of steel and copper. A crystal clear solution that can be used as an additive for pressure testing of tubing.

Solvent-Based

Thin Film

Steelgard® 1505 Series

These rust inhibitors come in a variety of flash points and drying times for use on steel and cast iron. They provide 6 - 18 months indoor storage protection under normal humidity conditions.

Steelgard® 8703 Series

Provides longer-term protection to ferrous and non-ferrous metals under normal indoor conditions. These products are low-odor and leave a “dry to the touch” film after evaporation.

Heavy Film

Steelgard® X-267-B

Long-term, outdoor rust preventive that can be used on ferrous or non-ferrous metals, in uncovered or covered storage conditions. Protects materials and parts for overseas and domestic shipments.

Steelgard® 1505-TC

Designed for indoor long-term protection of all ferrous and non-ferrous surfaces. Provides outdoor covered protection for up to 6 months. It displaces water and leaves a clear, non-staining film that dries within 3 hours.
